Backend / Software Engineering Intern

PROFESSIONAL SUMMARY

Computer Science student with hands-on backend development experience using Node.js, Express.js, MongoDB, and MySQL. Skilled in building RESTful APIs, JWT authentication, role-based authorization, validation, file uploads, and paginated responses. Strong foundations in data structures, algorithms, OOP, networking, and problem solving. Seeking a Backend or Software Engineering internship where I can contribute to real products and keep improving through mentorship.

TECHNICAL SKILLS

Programming: C++, Python, JavaScript

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Authorization, CRUD, Middleware, Error Handling, Express Validator, Multer

Frontend: HTML, CSS, Static Web Design

Databases: MongoDB, Mongoose, MySQL

CS Fundamentals: Data Structures & Algorithms, OOP, Problem Solving, Complexity Analysis, Networking Fundamentals

Tools: Git, GitHub, Postman

PROJECTS

Road to Glory Event Management REST API | Node.js, Express.js, MongoDB, Mongoose, JWT, Postman

GitHub Repository: <https://github.com/amotaz668-create/Road-to-Glory>

- Designed and developed a scalable Event Management REST API following the MVC architecture.
- Implemented JWT Authentication and Role-Based Authorization for Admin, Organizer, and Attendee roles.
- Built complete event lifecycle management including event creation, update, deletion, approval, and admin override.
- Developed ticket reservation, attendance validation, digital tickets, and feedback management modules.
- Implemented analytics dashboards using MongoDB Aggregation Pipeline for users, events, reservations, and attendance.
- Added pagination, centralized error handling, middleware-based authorization, and admin activity logging.
- Tested all REST endpoints using Postman and managed the project with Git and GitHub.

Course Management REST API | Node.js, Express.js, MongoDB, Mongoose, JWT, Multer, Postman

GitHub Repository: github.com/amotaz668-create/Course-Management-REST-API

- Designed and built a RESTful backend API for course management with a modular Controllers, Routes, Middleware, and Models architecture.
- Implemented JWT authentication and role-based authorization for Admin, Manager, and User roles.
- Developed secure CRUD endpoints with request validation, centralized error handling, and clean API responses.
- Integrated MongoDB with Mongoose for schema modeling and database operations.
- Added file upload support using Multer and pagination for scalable API responses.
- Tested endpoints with Postman and maintained the project using Git and GitHub.

HTML and CSS First Project | HTML, CSS, Static Web Design

GitHub Repository: github.com/amotaz668-create/HTML_And_CSS_First_Project

- Built a frontend website design using semantic HTML and custom CSS.
- Created clean page sections with consistent typography, spacing, layout, and visual hierarchy.
- Organized project assets including CSS files, images, webfonts, and the main HTML page on GitHub.

Food Delivery Mobile UI/UX Design | Figma

- Designed a modern mobile application for food ordering and delivery using Figma.
- Created complete user flows including onboarding, authentication, restaurant browsing, cart, checkout, and order tracking.
- Built reusable UI components, Auto Layouts, and design systems to ensure consistency across all screens.
- Applied modern UI/UX principles with a focus on usability, accessibility, and responsive layouts.
- Developed interactive prototypes to simulate real user navigation and application behavior.

PROBLEM SOLVING & COMPETITIVE PROGRAMMING

- Practiced algorithmic problem solving using C++ with focus on data structures, complexity analysis, and clean implementation.
- Participated in competitive programming communities and peer learning activities.
- Helped peers understand programming logic and improve coding performance.

VOLUNTEER EXPERIENCE

Programming Community Member | University Programming Community

- Assisted students in preparing for ICPC-style programming contests.
- Supported peers in solving algorithmic problems and improving their approach to debugging and implementation.

EDUCATION

Higher Technological Institute (HTI) - Bachelor of Computer Science, In Progress - Third Year

LANGUAGES

Arabic: Native | English: Intermediate (B1)
